- 100% positive results

The LiftUp project of JCI Tielt aids students of the first grade of secondary school (13-14 years) with their problem courses at school by providing them private lessons in math, Dutch, French, etc. In Tielt, the social care department of the city (OCMW/CPAS) provides such lessons to children until the sixth grade of primary school (12 years). There was a need for such a support for children when they start the first grade of secondary school (13 and 14 years).

The target of this project is to develop a sustainable, continuous after-school education program for children of the first grade of secondary school (13-14 years) in Tielt and, after three years of developing this program, to successfully transfer this program to the social care department of the city of Tielt.

With LiftUp, we help students to successfully acquire a diploma and to successfully integrate them in our local economy. On one hand, it's a way to get young people out of generation poverty and give them a hopeful future. On the other hand we're helping local businesses with finding and hiring well educated employees.
